## In Time of Peace.

In the first months of the Russo-Japan war we had a striking example of the necessity for preparation and the early advantage of those who, so to speak, have shod their mules in dry weather. The entire of preparation has made history and given us our greatest men. The individual as well as the nation should be prepared for any emergency. Are you prepared to successfully combat the first cold you take? A cold can be cured much more quickly when treated just as soon as it has been contracted, and before it has become settled in the system. Chamberlain's Cough Remedy is famous for the cure of colds and it should be kept at hand ready for use.

## HOYTSTOWN.

Hoystown, Nov. 20.—Born, to the wife of Irwin Crittenden, a daughter, on the 20. Mother and babe doing quite well. This is their first and Irwin is heard repeating to himself: "Papa, papa. How nice; and it's a girl. Well, I always did like girls anyhow."

We have had some very cold weather the last few days—in fact so cold that our school had to be discontinued Monday forenoon, also Tuesday, for the little ones. There is certainly something wrong somewhere.

## The Knock-out Blow.

This blow which knocked out Corbett from the earliest days of the ring the knock-out blow was aimed for the temple or the temple or the jugular vein. Standard practice were thrown. In the world, and among the nations, there is no place where the jugular vein is more vulnerable than the region of the stomach, held here taught at him for his life. On the jugular vein lies the heart, to the jugular is a parallel fact; that the stomach is the most vulnerable organ out of the brain ring as well as to the jugular vein. We protect our heads, thumbs, feet and hands, but the stomach we are entirely inactive and let it alone. Thus the water does not pass through the stomach.
